Subject Index to Volume 14

Accommodation	Further studies on accommodative convergence (*Yamamoto*)	102
Choroid	Ultrastructural differences between the choriocapillaris and retinal capillaries on the human eye (*Matsusaka*)	59
Color vision	Genetic studies on defective color vision in junior high school students (*Ichikawa et al.*)	202
Cornea	Electron microscopic study on the cornea. The mechanism of experimental new vessel formation (*Yamagami*)	41
	A new cornea-positive potential immediately following the early receptor potential (*Yonemura et al.*)	159
	The effect of ouabain on trans-corneal potential and short-circuit current of the isolated rabbit cornea (*Muneoka*)	172
	Ultrastructural observation on the cornea of Hurler syndrome (*Matsuda et al.*)	237
Diabetes mellitus	Lipoperoxides in diabetic retinopathy (*Ueda*)	190
	Clinical and experimental study of electroretinogram in diabetic state (*Ohtsubo*)	278
Electron microscopy	Ultrastructure of Schlemm's canal studied by a replica technique (*Segawa*)	1
	Electron microscopic observation of unmyelinated nerve fibers in oculomotor nerve trunk in cat (*Tanishima*)	9
	Ultrastructural localization of cholinesterase activity in the nervous system of the rabbit iris dilator (*Matsuda*)	21
	Electron microscopic studies of human lens. The structural changes due to aging in relation to senile cataract (*Kobayashi*)	29
	Electron microscopic study on the cornea. The mechanism of experimental new vessel formation (*Yamagami*)	41
	Ultrastructural differences between the choriocapillaris and retinal capillaries on the human eye (*Matsusaka*)	59
	Electron microscopic studies on blood-retinal and blood-aqueous barriers (*Shiose*)	73
	Electron microscopic observations on reactions of retinal Müller cells under pathological condition (*Uga et al.*)	223

	Ultrastructural observation on the cornea of Hurler syndrome (*Uga et al.*)	237
Electrophysiology	Electromyography of the extraocular muscles during sleep and anesthesia. Analysis on non-innervation discharge (*Matsuno*)	98
	Influences of environmental temperature on the electrical activity of rabbit retinas in vitro (*Honda*)	138
	Rhodopsin and ERG of hereditary dystrophic mice and experimental retinitis pigmentosa (*Yamasaki et al.*)	151
	A new cornea-positive potential immediately following the early receptor potential (*Yonemura et al.*)	159
	The effect of ouabain on trans-corneal potential and short-circuit current of the isolated rabbit cornea (*Muneoka*)	172
	Secretory potentials in the lacrimal gland of the rabbit (*Kikkawa*)	247
	Clinical and experimental study of electroretinogram in diabetic state (*Ohtsubo*)	278
Genetics	Genetic studies on defective color vision in junior high school students (*Ichikawa et al.*)	202
Iris	Ultrastructural localization of cholinesterase activity in the nervous system of the rabbit iris dilator (*Matsuda*)	21
Lens	Electron microscopic studies of human lens. The structural changes due to aging in relation to senile cataract (*Kobayashi*)	29
Lacrimal gland	Secretory potentials in the lacrimal gland of the rabbit (*Kikkawa*)	247
Fluorescein angiography	False or exaggerated narrowness of retinal arterioles in hypertensives —Comparative study of color and fluorescein fundus picture in hypertensives— (*Matsumoto*)	263
Motility, ocular	Cyclic oculomotor paralysis (Cyclic oculomotor spasm relaxation phenomenon) (*Morizane et al.*)	111
Muscles, extraocular	Electromyography of the extraocular muscles during sleep and anesthesia. Analysis on non-innervation discharge (*Matsuno*)	98
	Lactic dehydrogenase isozymes in extraocular muscles (*Ueda et al.*)	183

	Fine structure of extraocular muscles with myasthenia gravis (*Sakimoto*)	210
Nerves, oculomotor	Electron microscopic observation of unmyelinated nerve fibers in oculomotor nerve trunk in cat (*Tanishima*)	9
Optic nerve	Optic nerve atrophy following cryptococcal meningitis (*Imachi et al.*)	146
Retina	Presence of adrenergic innervation to the retinal vessels. A histochemical study (*Fukuda*)	91
	On thickening of arteriolar walls in retinal arteriolar sclerosis (*Itoh*)	127
	Influences of environmental temperature on the electrical activity of rabbit retinas in vitro (*Honda*)	138
	Rhodopsin and ERG of hereditary dystrophic mice and experimental retinitis pigmentoas (*Yamasaki et al.*)	151
	Lipoperoxides in diabetic retinopathy (*Ueda*)	190
	False or exaggerated narrowness of retinal arterioles in hypertensives (*Matsumoto*)	263
	Clinical and experimental study of electroretinogram in diabetic state (*Ohtsubo*)	278
	Intracorporal rhythm in patients with retinitis pigmentosa (*Akabane*)	269
	Electron microscopic observations on reactions of retinal Müller cells under pathological condition (*Uga et al.*)	223
Schlemm's canal	Ultrastructure of Schlemm's canal studied by a replica technique (*Segawa*)	1
